Art Unit: 1745

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a rechargeable battery, classified in class 429, subclass 163.
 - II. Claims 10-11, drawn to a battery module, classified in class 429, subclass 156.
2. The inventions are distinct, each from the other because: Group I is directed to a battery while Group II comprises a battery module. In addition, Group I requires the separate electrodes to extend out from opposite sides of the electrode assembly, which feature is not part of the Group II module. Also, Group II includes connection terminals, which elements are not claimed with the Group I battery.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to William Boshnick on November 7, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
